es for the custing year. — -Francis Parry, Esq. and R. S. Walker, Esq. nd as auditor W. C. Hunter Esq.

The San Francisco Steamers, A correspondent of a Sau Francisco paper ie Beening Bullette, in giving an account of trip to New York via Panama, refers as ollows to the intended line of steamers beween Ching and California:-

There was a rumor current in California when's left, that the Paville Mail Stramship Company, high has the contract for steam mail service to ps and China, would anticipate the time fixed Congress for the beginning of said serviceannary 1st. 1887-and bogin during the apring I the present year. Inquiry at the office of the ompany here does not confirm this rumor. he propriety of anticipating the time as stated, as been considered, but it is not probable at the Asiatic steamships will commence anning before next year. Meanwhile two gniticent steamers. Inrger than any heretore constructed in the United States, are now ing built for the new service" in this city. key will have a burthen of 4 500 tons. Governent measure, and he balls extra strong, double anked and iron-braced. The Colorado will probay be strengthened and adapted for the same svice. Apart form the enpucity that it is, premed will be required to meet the expected sight business between Onlifornia and Asia, pace will be needed for atoring a large amount of al as there will be no coaling station within aout 5 000 miles. The steamers will sail on when terme the grand pirets from Ban Francisco to anagawa, with probably a branch service to the andwich islands. Very fixely, the monthly seres to Japan and Ohina will it maderate freights e charged, show be increased to a semi-monthly ervice. What port will be made in China has t yet been concluded and will not be until the turn of the Company's agent, who is new visit-Z San Francisco, Japan and China, to examine d report. In this connection the Company-has en advised of the desirability of Shanghao as weer than Hongkong, and is the great central st of the Chine, into which pours the Yangtacong. This river is navigable for steamure out 800 miles. It is about 60 miles wide for a neiderable distance, and flows through fertile leys and by populous cities that offer to Amecan enterprize A bampting opportunity. It is settined to begine the centre of American caensize in Ohina, Rongkong is simply an Engport, where we would have to struggle with ier disavantages besides English competition unghai offers every facility for repairing ships

the shape of first-rate docks, etc. It is, besides e silest terminus. Steamers that go there will aid the typhogns, which sweep over the south. s coast of Chine during the months of July, zust and November. Such arguments as these forcibly urged by American residents and mentar agents in China, and will probably have ach weight. Sagacity and liberality at the beoning will accure a great true with Uhina at an the Berlin correspondent of the Parsenhalle tes that the King of Prussia will not go to St. tereburg as announced, to be present at the ebration of the 25th anniversary of the Em-

or Alexander's marriage, but that the Royal use will be represented at that solembily by ince Charles and other Prussian prince. MR. HAWRINS' HORSES.—We have this morof seen a fine draft of Horses shipped by Mr. G. Hawkins on board the Engine of Adde Hongkong. They are a splendid lot of well d Saddle and Harness Horses, and us they ve be n selected by Mr. Hawking himself who for some years a resident of Hongkong y will doubtless be throughly well suited for t morket. They are the best lot we have n leave Sydney for some time. — Sydney Herold. INA COMPUSE -At a Mufacull'station, not very g ago, it was our furture to hear an individual aplaia bitterly of the probable monotony dinieent upon the approaching but weather, " fireadindeed," said a lady present, " hat we are sure have plenty of quarrels; that is one comfort." dras dihantauni.

CINNABAR DEPOSITS. The only mine of cinnabar which has been extensively worked in the State, and with large profit, is that of New Almadon: indeed this mine is THE Pramises recently occupied by Merers. Ra the second in importance in the world; it is only inferior in productiveness to the Almaden mine itself, the average monthly produce of quicksilver for the half year ending December 1864, being 1.118 flacks, or about 300:000 nounds, equal to 3,500,000 pounds per nonum. The present capacity of the reduction works is equal to a production of 5,000 flasks monthly, or 4,500,000 pounds per annum. With the New Almaden, the Enriquita Mine is now united, and the total production. of the two, since July, 1850, is given in the published statements of the company at 371.8 0 flasks of which the Euriquita furnished 10.571 only. The ore from which the larger portion of this amount of metal has been taken oucupied a sories of irregular cuvities, mostly confined within a in Zetland Street. For particulars amply to snace about 100 feet square and extending downwards for about 409 feet. This cre-ground dips to the north at an angle of 30 deg. to 35 deg., with the formation, and the masses or chambers of ore are scattered through it without any agpreach to regularity, 28 is shown by the fact that there have been times when there was no ore in

sight in the mine, in spits of its great average productiveness. The gre-ground extends for some five miles the northwest, in the line of strike of the struta. and has been opened and worked at interval, although no one locality has at all approached in THAT House in Aberdeen Street, No. 1, Lands productiveness the New Almaden bline itself. Mine Hill, was opened in 1859; but was closed and Servents Rooms. from May, 1861 to May, 1863; it has produced about 1,500,000 pounds of quicksilver, but his not been worked with profit, owing to the irregular distribution of the ore. The same is true of the Guadalune Mine, two miles beyond the Enriquita, where, up to 1862, nearly \$500,000 had been ex- Storage hy one whole Godowe or by To par Bale

nended in prospecting. Quicksilver is one of the important articles of export from California; a large portion of it (in 1864, just one half) goes to China, the remainder chiefly to Mexico and the Bouth American States. The average amount shipped from San Francisco for the last five years has been 33,11'S flasks, or hain Street, suitable for a office or dwelling. penriv 2.500,000 pounds per annum. Considerable patrices of the quickshiper-destring rock occur in the hills around the mission, and

both the native metal and the suiphurch (cinapar)

able deposit has yet been discovered The trouble with all the deposits of cinnabar just noticed is, that they are too irregular, and that the ore is not sufficiently concentrated, or is arge enough masses. There is no reason why heavy deposits of ore should not be met with, insinking upon the outcrops in which small quantiter of certainly and, as the result of actual ex- Paner. nevicuce, it may be stated, that in the only instance where a deposit of ore has been discovered suffigiently large to pay for continuous working, there ! was a correspondingly large display at the surface; this was not the N. W. Almaden Mine, which was undoubtedly known to the natives for a long time previous to the arrival of the whites on those

BAISTENCE OF PRINCLEUM. Atlantic States has penetrated to the Pacific Bank of Hindurton China, and Jupan. The prinmore fluid oil in connection with the solid asphal- Offices or Chambers. tum has fed to unbounded hopes of a vest production of petroleum in the Coast Ranges of California, creating and excitement which has been skillfully made use of by unprincipled speculators, for their own purposes, by the creation of stock companies with an immense number of shares, which have been disposed of to a oredulous public, asarly the whole proceeds of their sale being clear profit to the promoters of these enterprises. while it is certain that, even under the most favorable conditions, the luckless stockholders will

money ingeated. · Our line of exploration, through the asphultum admirably suited for a Banking institution or large region in Santa Barbara and Los Angeles coun - Mercantile firm. ties did not happen to lend us to those funches which have become celebrated by the formation of munster oil companies on them, although w examined carefully all the localities where, at that time, the asphaltum was being made practically / [11] House in Wellington Street, (formarly available; in none of, these did it happen that

At an early period of the survey, a considerable | Offices, Stables and Godowns. quantity of the asphaltum of this region was for- For further particulars apply to. warded by us to an Eastern city, where it was examined by a highly skilful chemist, well sequainted wit this class of substances, to see if it or Mesers' Augustine Heard & Co.'s Compradore, could be made available as a source of burning oil, under the present conditions. The answer to his question was in the negative, and subsequent rials, on the somewhat larger scale in Oalifornia. have confirmed this result. We consider it a gettled question, that with the facilities and conditions which now exist, the auphaltum cannot be I profitably used for the manufacture of burning or having a two-storied detached Granity Gudown. lubricating oil. It is not necessary, in this place to go late a detailed statement of facts to prove this; that may be more properly reserved for the volume of Economical Geology. Those who doubt the statement onn, if they see fit, dovate their time and money to proving it to be incorrect by actualpractical results.

roleanie forces in this region, there is nothing more interesting and remarkable than the rotealled "Borax Lake" and its vicinity. This lake ocupies Wyndham Bernet. a depression on the east side of the parrow arm of Clear Luke, from which it is senarated by a low ridge of volcavio, muterials, lying loosely, heaped to gettler, and consisting of scorize, obsidise, and milital Lorge Isolated Dwelling house known as pumied. The Borek Lake is of variable dimensiene, according to the season of the year and the Rooms, Water laid on in the Bath Rooms, Kitchen comparative dryness of the esason. When ex | Pantry and large Stebles detatched at present nmined (September 1863) the water occuppied an accompled by Col. Jonner :- Possession can be had area of about 4 000 feet long, and 1,800 feet wide on the let February. in the widest place, and its shape was irregularly eval, its longer axis being turn d in the direction of east and west, magnetic; it has once extended nearly twice of far to the southeast, and the ground is bardly raised above its present level in that G GRANITE GODOWNS on Marine Lot. No have been entirely dry during the summer before about 25000 Picula holding expanity for one or the great rains of 1881-62. In 1863 the water was | two.

about three feet drep. The existence of the lake was first made known to the world by Dr J. A. Ventch, who examined it in September 1856, and detected the presence of borax in its waters, but it was not till some months afterwards that the existence of a large bed of crys- | and us present in the occupation of blosses tals of this valuable material in the botom of the Remembers and SANDER, lake was discovered. The land about here has been located by the " Onlifordia Horax Company," the agents of which have caused explorations to be made, have find the waters carofully analyzed, and were in 1864, preparing to manufacture beraz on a largo scalo.

THE BIG TREES. The Big Trees are, indeed, among the greatest wonders of California, and require no exaggeration to make them attractive. Full particulars in regard to their growth, habits and dimensions, will be given in the botanical volume of the Geological Report; it need only be added that the age of the tree which was out down in the Calaverse Grove, and which, at six feet above the was found to be about 1,300 yours. It was easy nhout a foot in diamter, at the centre of the tree, of 2500 Tons such. from which the wood was decayed away, it would he a reasonable estimate to call the age of this particular tree 1,300 years. The difference in the rapidity of its growth, at different ages may be inferred from the fact that the width occupied by 100 rings at the centre of the tree was 18 inches. and next to the bark was only three.

THE CREED OF THE AMATEUR ACTOR. - I believe in myself. I believe in nobedy clas. Actors have lived before me; actors will probably live after mer but I am only the actor whose name will be re- 1 A Rooms, bath Rooms and Servants Offices, membered. I am perfect, faultless beyond cri- and dominanding the whole view of the larbor ticism. To suggest that I am not faultless is an and town, and delightfully situated behind the evidence of base mind. To hint that anyhody Albany Southward of Mr W. H. Alexander's rehas impersonated a character more successfully sidence. than I have, is equal to the commission of a crime, | f am a living proof that an actor may passess boundless versatility. I have never fulled in anything I have attempted. I am equid to the whole range of dramatic creations from Hamlet to Harleanin. I consider investi the univ capable interprefer of Shakespeare, the only sufficient analyst of his meaning. I regard myself superior to Shakespeare, inasmuch as Shakespeare did not at | 1f 631 Hongkong, 3rd April; 1864. all times comprehend his own meaning; and as I of my company as existing only to but off, by solicits a share of public patrologie. their littleness, my own transcendent greatness .-Melbourne Punch.
